GEC MADRAS

Country of manufacture:	India
Year of manufacture:	1941
Number of blades:	3
Diameter:	140 cm
Power:	100 watts
Weight:	18 kg

GEC MADRAS

India - 1941

In 1886 two German immigrants, Gustav Biswanger and Hugo Hirst, founded The General Electric Apparatus Company in London, which three years later became the General Electric Company; it then expanded rapidly, setting up subsidiaries and factories in Europe, Japan, Australia, South Africa, India and South America

We indeed found models of GEC fans in both Britain and India, still with their original labels. We came across the Madras model, a 3-bladed fan with a diameter of cm. 140, with the "Made in India - 1941" label.

Guaranteed quality

Fantique's "Period Originals" collection is covered by a 2 year warranty. Hand assembled one by one, the fans are checked and tested individually in each and every components before packaging. Every function is also meticulously tested: from balancing and blades inclination to flow rate, from electric standards to rigorous endurance tests (5 hours at full speed).

Telephone assistance

Our antique fans are mounted in the same manner as commercial models, which is quite simple. We nevertheless recommend that you rely on qualified personnel, to whom Fantique offers telephone assistance free of charge on any issues (not necessarily related to the mounting of the fan), by simply calling the following numbers: +39 06 68802417 or + 39 337 733077.
