KINGSTON BIG

Country of manufacture:	GB
Year of manufacture:	1920
Number of blades:	3
Diameter:	160 cm
Power:	120 watts
Weight:	23 kg

KINGSTON BIG

Great Britain - 1920

Based in Portslade, Great Britain, Kingston Engineering Co. was a long-established fan manufacturer which halted its production quite a while ago. Kingston started manufacturing direct-current fans but in the 1920's switched to the production of an alternating-current model, available in two blade diameters: 120 cm and 160 cm.

Because of a limited and geographically circumscribed production, these fans are nowadays very rare and difficult to come by in good conditions. The Fantique collection consists of only one model with 160 cm blade diameter: its large size and weight notwithstanding, the Kingston Big fan stands out for its stylistic grace and balanced proportions.

Guaranteed quality

Fantique's "Period Originals" collection is covered by a 2 year warranty. Hand assembled one by one, the fans are checked and tested individually in each and every components before packaging. Every function is also meticulously tested: from balancing and blades inclination to flow rate, from electric standards to rigorous endurance tests (5 hours at full speed).

Telephone assistance

Our antique fans are mounted in the same manner as commercial models, which is quite simple. We nevertheless recommend that you rely on qualified personnel, to whom Fantique offers telephone assistance free of charge on any issues (not necessarily related to the mounting of the fan), by simply calling the following numbers: +39 06 68802417 or + 39 337 733077.
